Purpose of the Project

- Provide better equity, transparency, and accountability to licensees
- Improve efficiency and control costs

Efficiency

- consolidate license processes
- renewal cycles, refunds
- late fees, exams processing
- consistent statutory model

License Equity

- Improve consistency
- Assign costs to skill level
- Separate individual/business
- Fee for service transparency

Department of Labor and Industry Construction Codes and Licensing Division (CCLD)

Current License Fee Structure - History

- Currently a pre-construction code consolidation structure
- Business processes from 5 different agencies
- 16 different license rates, ranging from \$0 to \$450
- Very little transparency relating licensing cost and service
- High maintenance and support costs

Department of Labor and Industry Construction Codes and Licensing Division (CCLD)

Proposed License Fee Structure

- Single CCLD license fee structure
- 4 different base license rates, \$10 to \$100
- Consolidated fee statutes
- Provide transparency using fee for service methodology
- Contain maintenance and support costs
- Agency revenue neutral based on FY'2009 collections - \$5.2M
- DLI fee model with justifiable costs
