Expected: The captions will now populate correctly.

4. Issue: When an RFA was filed to change QRC, the webform reversed which was the current QRC and which was the proposed QRC.

Expected: The names of the current and the proposed QRCs now populate correctly.

5. Issue: In some cases, the employee name was not populating in the caption of an RFA response.

Expected: The employee name will now populate correctly in the caption of an RFA response.
