**SUBJECT:** Elevator Related Devices Effective Code Years

---

## Elevator Related Devices Effective code years

Through the years the Elevator Related Devices codes have been located in various chapters of the State Building Code. As a result, it has been difficult to identify what codes were in place during specific years. To clarify this issue, the Department researched the State Building Code since its adoption in 1972 and identified the effective dates of various code editions as well as the corresponding building code chapters.
