

MINNESOTA REGISTERED APPRENTICESHIP EXPANSION

-MNRAE-

Related Training Instruction Grant Funding Available

Providing Minnesota's businesses with access to a highly trained workforce, prepared for the 21st century.

FUNDING GOAL

Increase Minnesota's workforce capacity, diversity, and accessibility through the proven strategy of registered apprenticeship.

Connect Minnesota employers with the benefits of registered apprenticeship. Support the development of quality programs designed to place, and retain, 800 new registered apprentices in high-growth occupations which could include the following industries and more:

- Construction ● Health Care ● Transportation ● Advanced Manufacturing ●
- Agriculture ● Information Technology ● Public Sector ●
- Utilities ● Automotive ● Hospitality ● Financial Services ●

PROGRAM GOALS

The MNRAE funds are available through a \$1.3 million grant provided by the US Department of Labor, Employment and Training Administration. The goals of the RTI funding are:

1. Provide existing registered apprenticeship sponsors funding support to expand into new apprenticeable occupations, or grow current programs, thereby increasing the number of new apprentices;
2. Provide new sponsors with funding to assist them in the development of new registered apprenticeship programs.

HOW IT WORKS

Applicants may be eligible for up to \$1,000 for each new apprentice. These funds could be used for the initial start-up costs related to supplies, materials, instruction and program infrastructure of new apprenticeship programs. Existing registered apprentice programs may also be eligible to support new occupation training programs.
