

Affirmation for Construction

Title: Affirmation for Fire Walls and Fire Area Separation Walls

Document ID: AFF-BPR-2026-02

Effective Date: January 02, 2026

This affirmation is issued in accordance with the Guidance Document titled “Affirmations for Construction – Purpose and Expectations,” and applies to public buildings and state licensed facilities as defined therein.

The licensed certification on this code data sheet confirms that I, or those under my direct supervision, have visually inspected the readily accessible portions of the existing represented fire wall(s) or fire area separation wall(s) identified on the construction documents submitted for plan review.

I affirm, to the best of my knowledge and based on visual observation of readily accessible areas, that the visible fire resistance rated assemblies are present as identified on the construction documents. Any required repairs observed to restore or complete the fire resistance rated assemblies and opening protection are incorporated into the current scope of work.

I further affirm that, should any portion of the fire wall(s) or fire area separation wall(s) be found to be substantially non-compliant by the inspecting authority having jurisdiction, the owner has been informed that the scope of work may require modification to include necessary repairs to the indicated fire wall(s) and/or fire area separation wall(s), should actual field conditions differ from those documented in the survey.
