

Hazard survey

If this survey is completed in-house, also provide safety committee meeting minutes that document the discussion of the hazard survey and the recommendations being made.

Date of survey: _____

Provide the names and job titles of those conducting the hazard survey.

Provide a detailed description of the work tasks being evaluated or observed.

Provide a detailed description of the observed hazards (struck by, crushed by, fall, repetitive motion, etc.). What is the source and how are employees exposed?

Provide details of the hazard control recommendations to prevent worker injury or illness (details about the project you will be implementing to protect employees from harm).
